

## No. of Functional Features Included in the Solution

|                      |                                           |
|----------------------|-------------------------------------------|
| <b>Date</b>          | 5 July 2026                               |
| <b>Team ID</b>       | XXXXXX                                    |
| <b>Project Name</b>  | A comprehensive Measure of the Well being |
| <b>Maximum Marks</b> | 5 Marks                                   |

### Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

| S.No | Feature Name       | Feature Description                 | Module / Component | Status (Done / In Progress / Pending) | Marks Contribution |
|------|--------------------|-------------------------------------|--------------------|---------------------------------------|--------------------|
| 1    | Data Collection    | Load HDI dataset                    | Dataset            | Done                                  | High               |
| 2    | Data Preprocessing | Clean and prepare data              | Preprocessing      | Done                                  | High               |
| 3    | Data Visualization | Generate EDA graphs                 | Visualization      | Done                                  | Medium             |
| 4    | HDI Prediction     | Predict HDI using Linear Regression | ML Model           | Done                                  | High               |
| 5    | Model Evaluation   | Evaluate model performance          | Evaluation         | Done                                  | Medium             |
| 6    | Model Saving       | Save trained model using Pickle     | Deployment         | Done                                  | Medium             |
| 7    | Flask Web App      | User interface for prediction       | Frontend/Backend   | Done                                  | High               |
| 8    | GitHub Integration | Version control and collaboration   | Git/GitHub         | Done                                  | Medium             |

### Feature Summary:

| Metric                     | Count / Value |
|----------------------------|---------------|
| Total Features Planned     | 8             |
| Total Features Implemented | 8             |
| Core / Must-Have Features  | 6             |

|                                    |   |
|------------------------------------|---|
| Additional / Nice-to-Have Features | 2 |
| Features Tested & Verified         | 8 |

**Feature Category Breakdown:**

| S.No | Category                  | Features in Category | Example Features                                           |
|------|---------------------------|----------------------|------------------------------------------------------------|
| 1    | User Interface (UI)       | 1                    | Flask Prediction Page                                      |
| 2    | Backend / Logic           | 4                    | Data Preprocessing, Model Training, Prediction, Evaluation |
| 3    | Database / Storage        | 1                    | Pickle Model Storage                                       |
| 4    | API / Integration         | 1                    | Flask Application                                          |
| 5    | Security / Authentication | 0                    | Not implemented                                            |
